Should we use toric haptic scleral lenses on everyone?

Gregory W. DeNaeyer OD FAAO

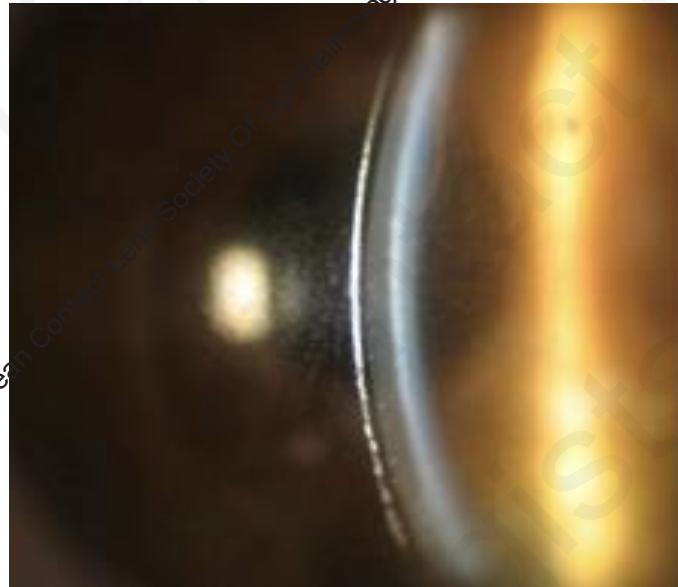

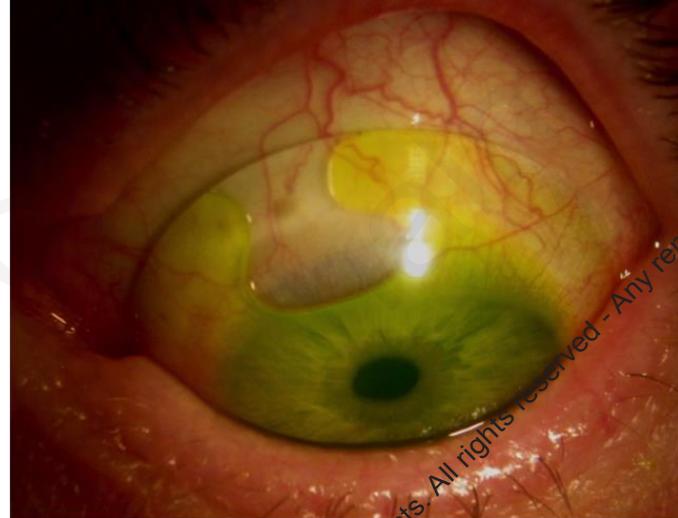

Disclosures

- **Visionary Optics**
 - Europa Scleral®
 - Elara Scleral®
- **Precision Ocular Metrology**
 - sMap3D™

Scleral Shape

- Sclera
 - Non-rotationally symmetric
 - Mismatch between lens haptic and eye create the most common fitting complications

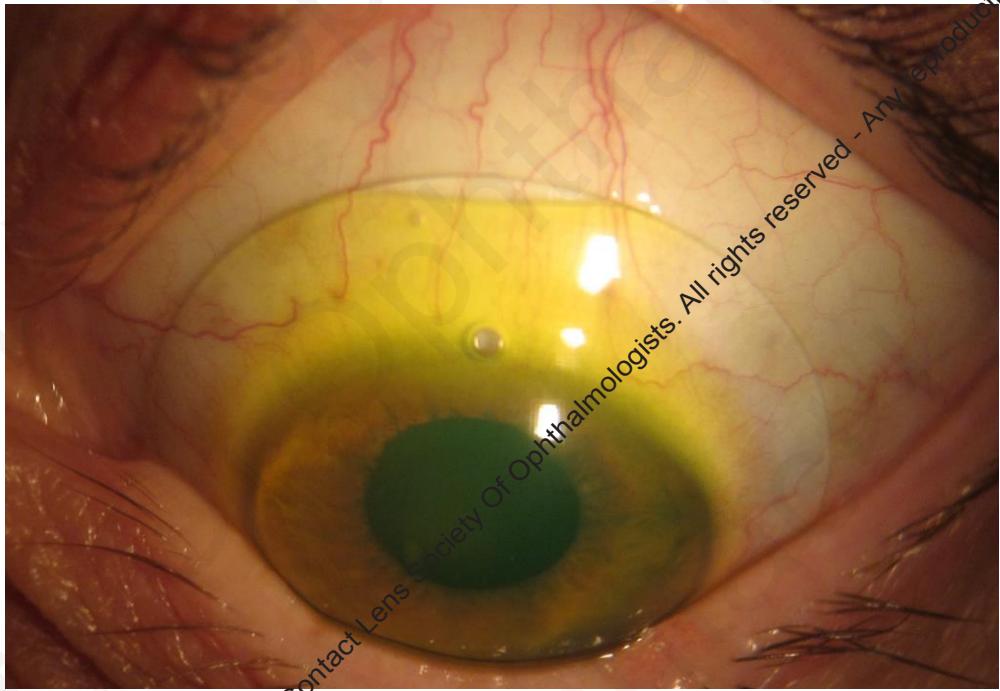

Modern Scleral Lenses Part II: Patient Satisfaction

Visser ES, Visser R, van Lier HJ, Otten, HM

Eye & Contact Lens: Science & Clinical Practice 2007; 33(1):21-25

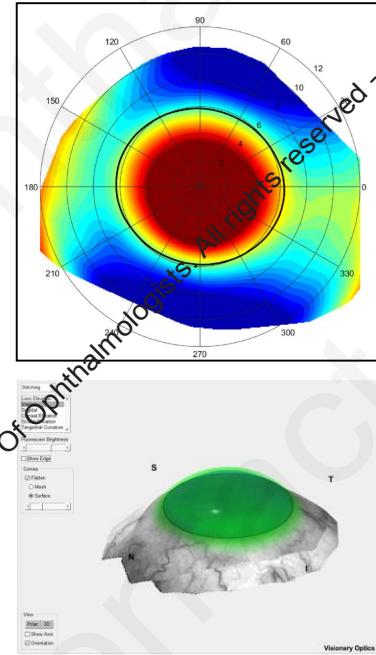

- Patients showed a preference towards back-surface toric sclerals.
- 99 eyes switched from spherical to back surface toric scleral lenses.
 - Increased Comfort
 - Improved visual quality
 - Improved overall satisfaction

Diagnostic Scleral Lenses Assessment

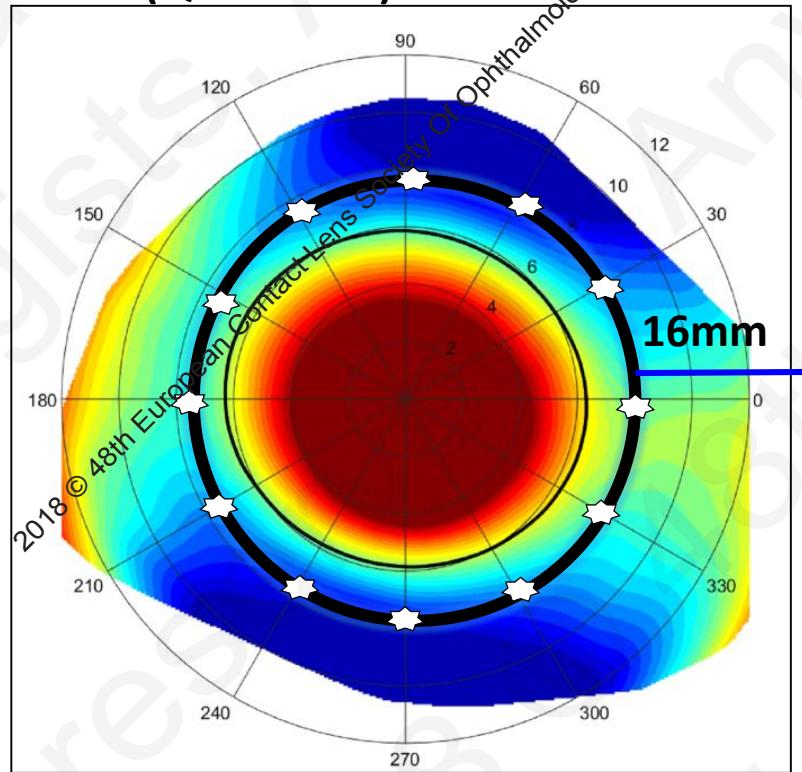

Topography

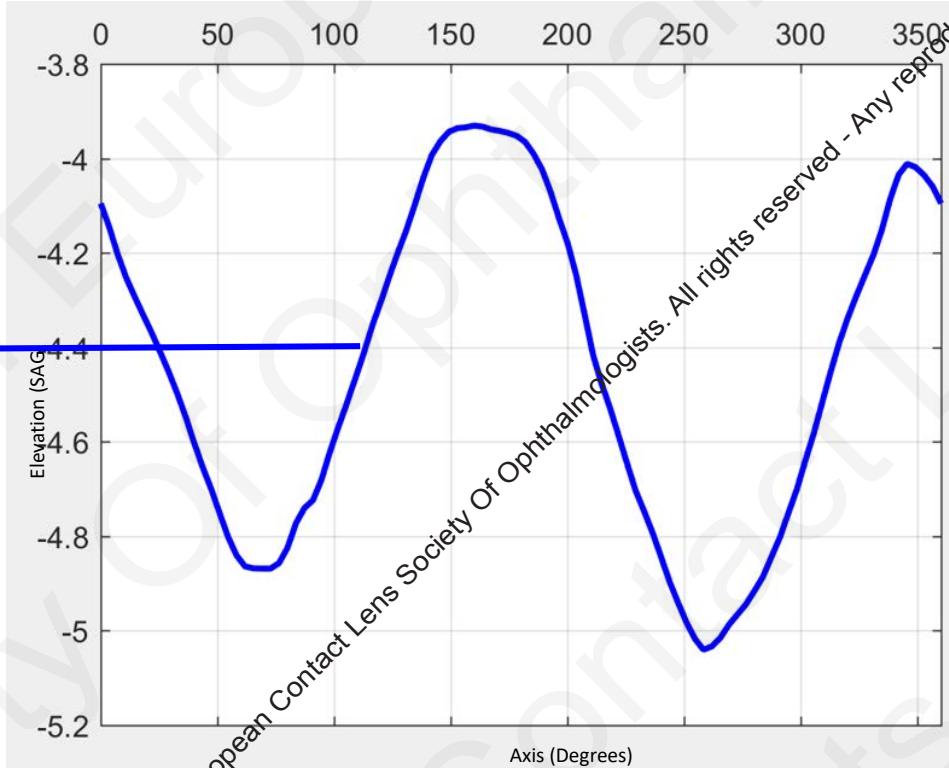

- Corneal Topography

Original Research
QUALITATIVE ASSESSMENT OF SCLERAL SHAPE PATTERNS USING A NEW
WIDE FIELD OCULAR SURFACE ELEVATION TOPOGRAPHER: THE SSSG STUDY
By Gregory DeNaeyer, OD¹, Donald R. Sanders, MD, PhD², Eef van der Worp, OD³, Jason Jedlicka, OD⁴,
Langis Michaud, OD⁵, Sheila Morrison, OD⁶

JCLRS.org

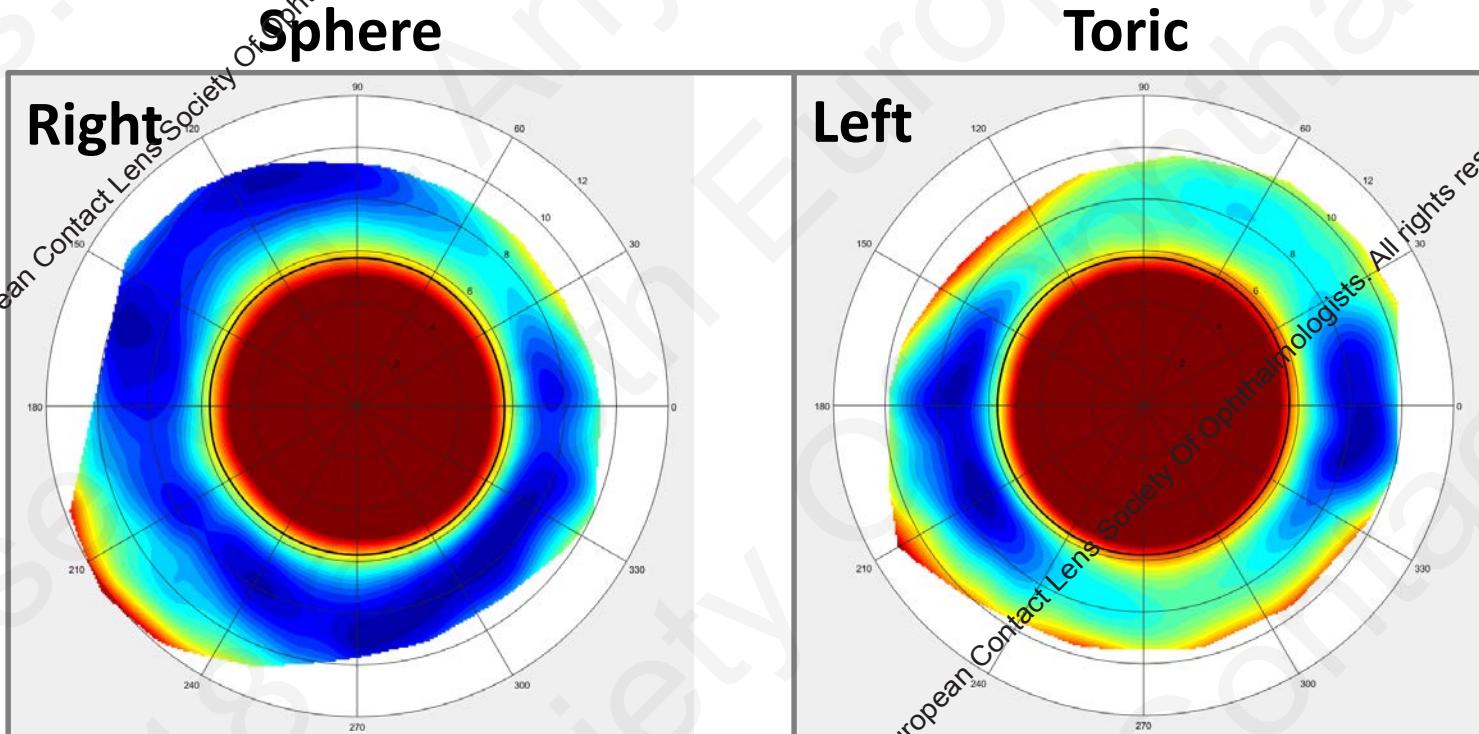

Objective: Examine new findings of conjunctival/scleral shape and to propose a new classification system for scleral shape

Scleral Surface Patterns

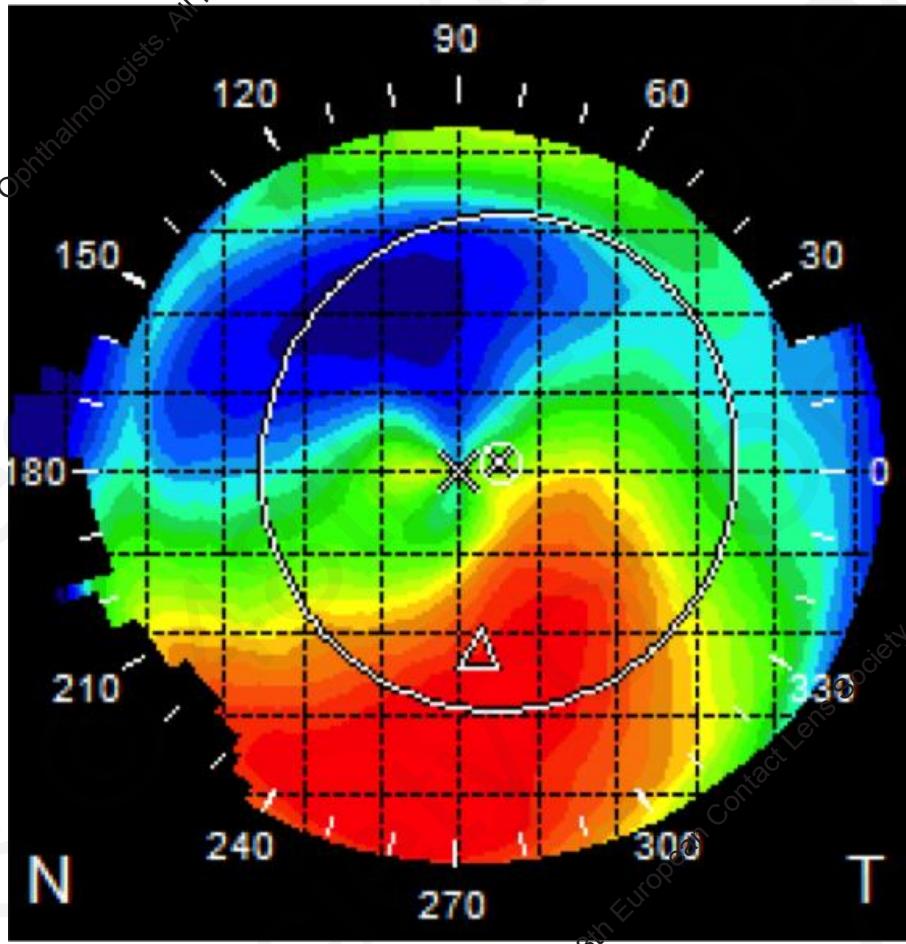

**Table 1 Scleral Surface Patterns
Observed in 140 Scleral Lens Patients**

Group	Pattern Description	N(%)
1	Spherical	8 (5.7%)
2	Toric-Regular	40 (28.6%)
3	Asymmetric High or Low Points	57 (40.7%)
4	Periodicity different from 180°	35 (25%)

Inter-ocular differences

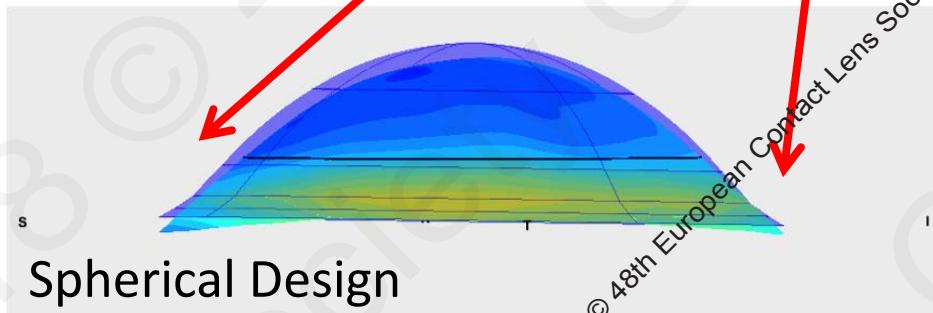

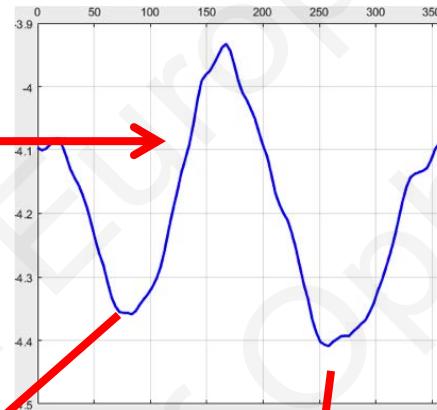

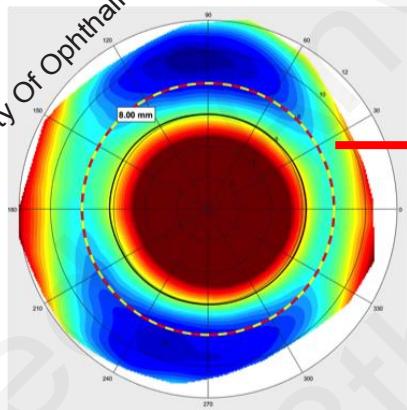

Back surface haptic toricity

Corneal Topography[©] - Corneal Ectasia

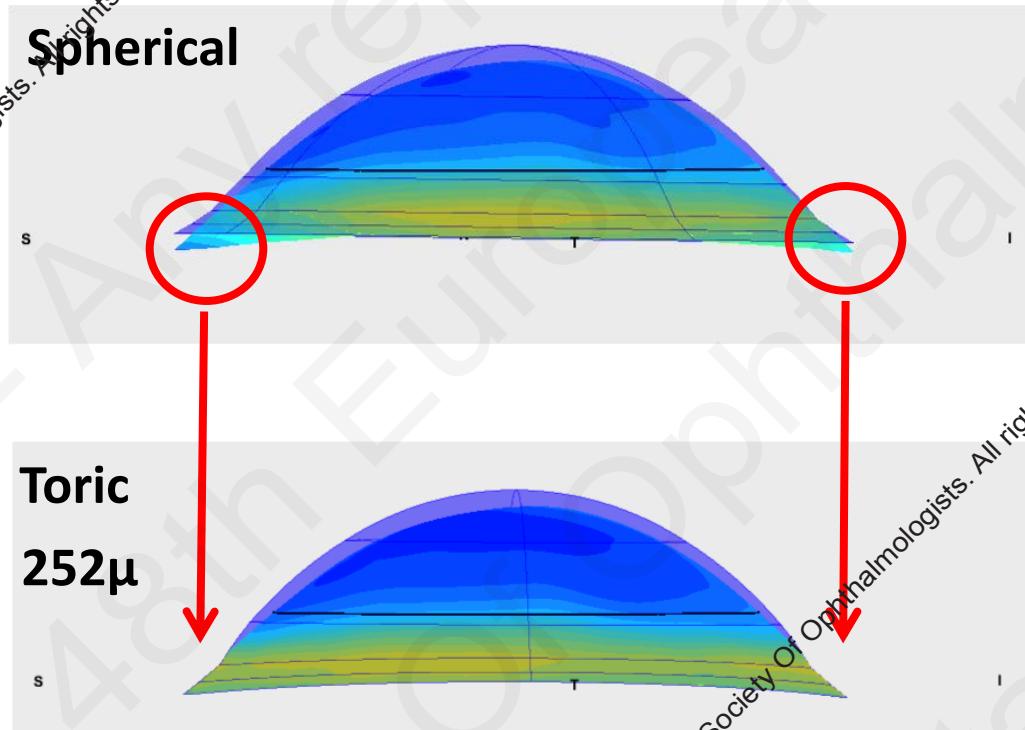

Ectasia- Haptic Toricity

Scleral Elevation

Spherical Design

Ectasia- Toric Scleral Lens

SCOR -5.25 -1.00 X 075

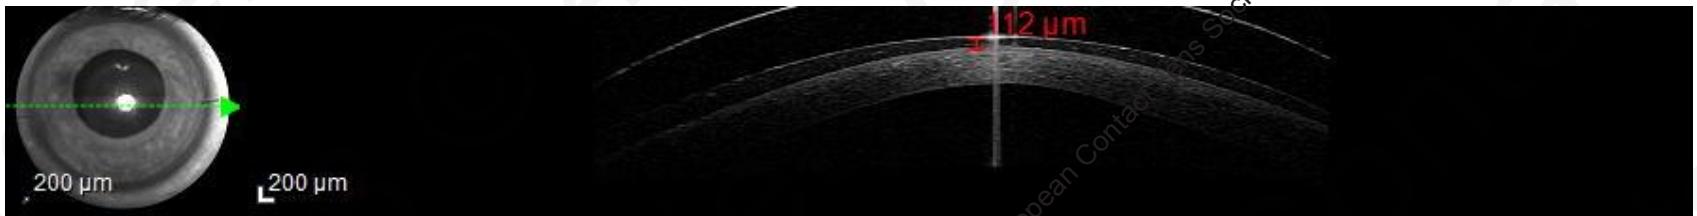

Front/Back Toricity

16.5 mm

Back Surface Toric 252 μ

Front Surface Toric

-1.62 -0.75 X 075 20/25

Scleral Surface Patterns

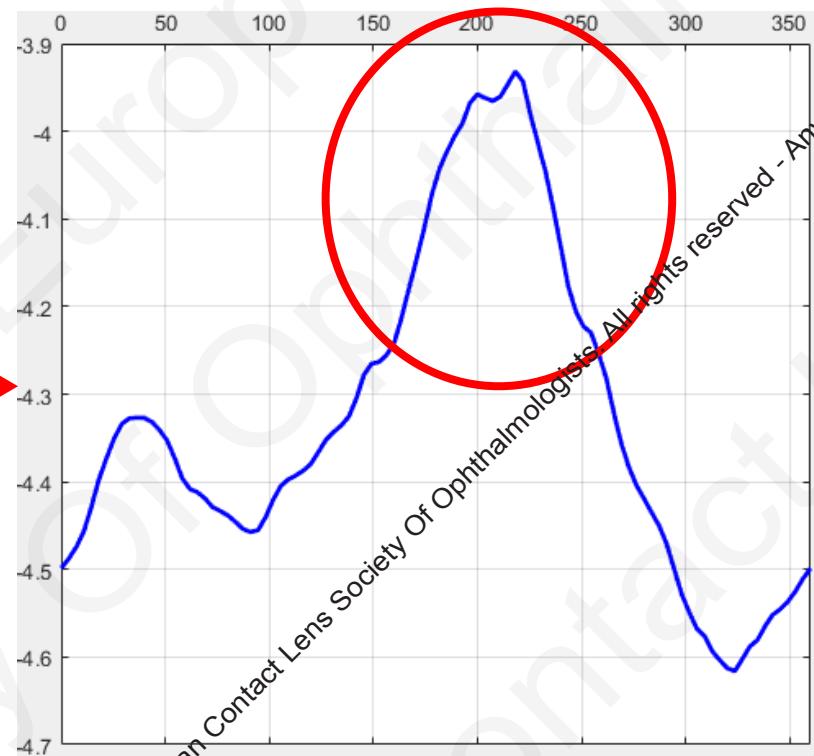

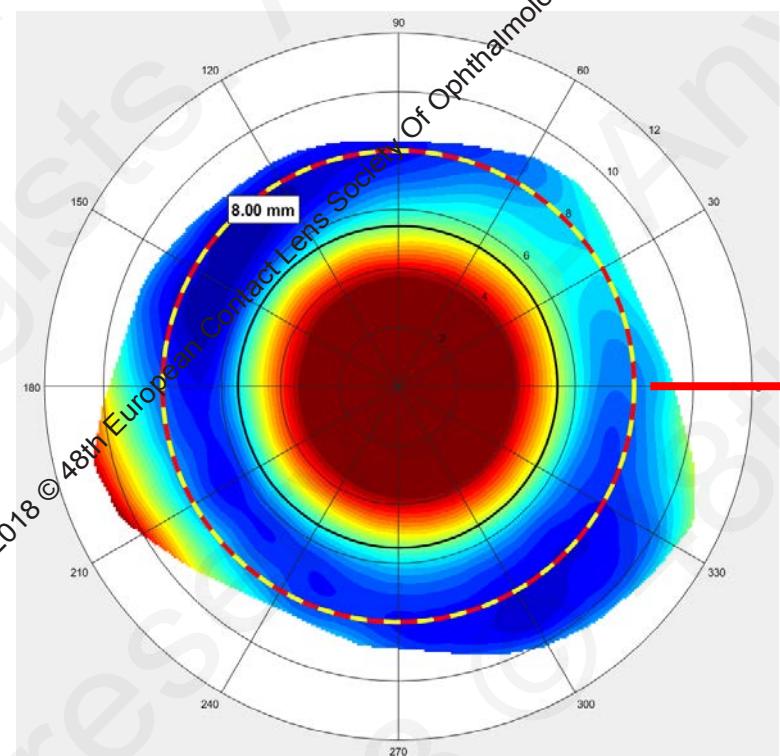

**Table 1 Scleral Surface Patterns
Observed in 140 Scleral Lens Patients**

Group	Pattern Description	N(%)
1	Spherical	8 (5.7%)
2	Toric-Regular	40 (28.6%)
3	Asymmetric High or Low Points	57 (40.7%)
4	Periodicity different from 180°	35 (25%)

**What happens when you fit an asymmetric sclera
with a back toric haptic scleral lens?**

Scleral Asymmetry- Horizontal

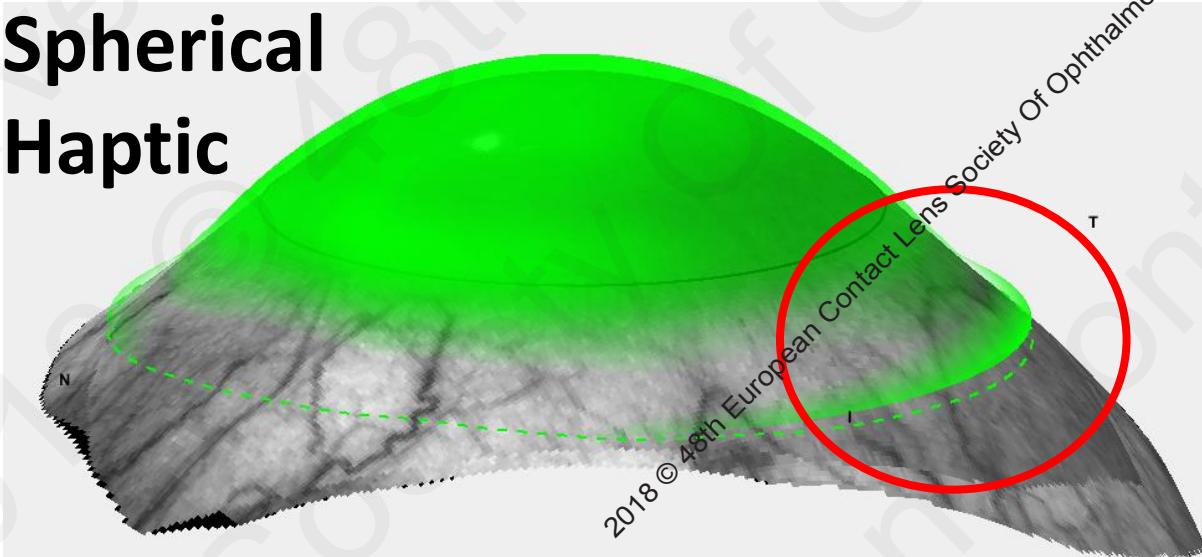

Scleral Asymmetry- Horizontal

Scleral Asymmetry - Horizontal

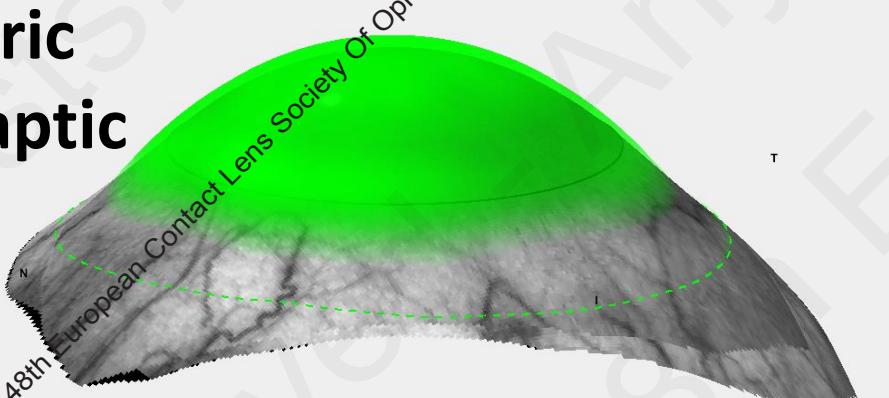

**Spherical
Haptic**

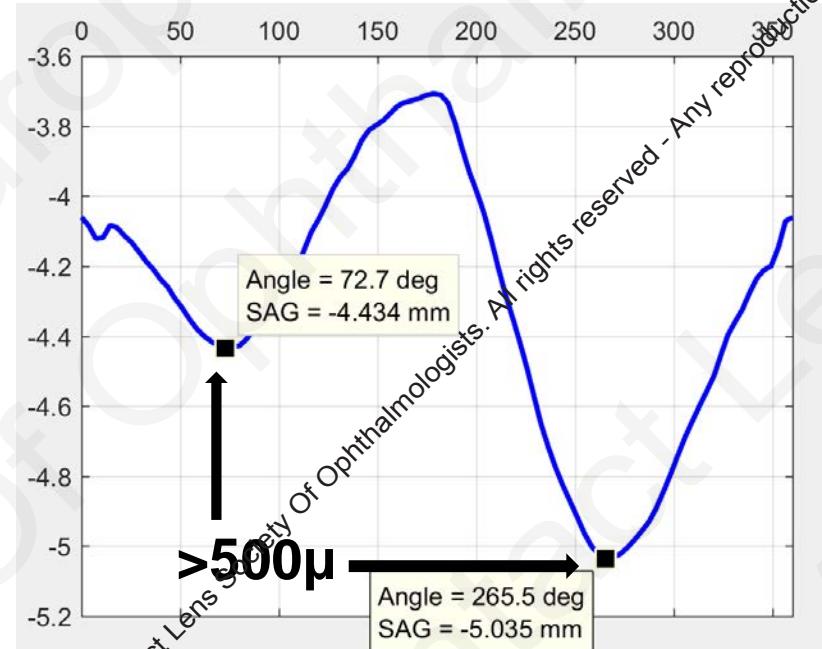

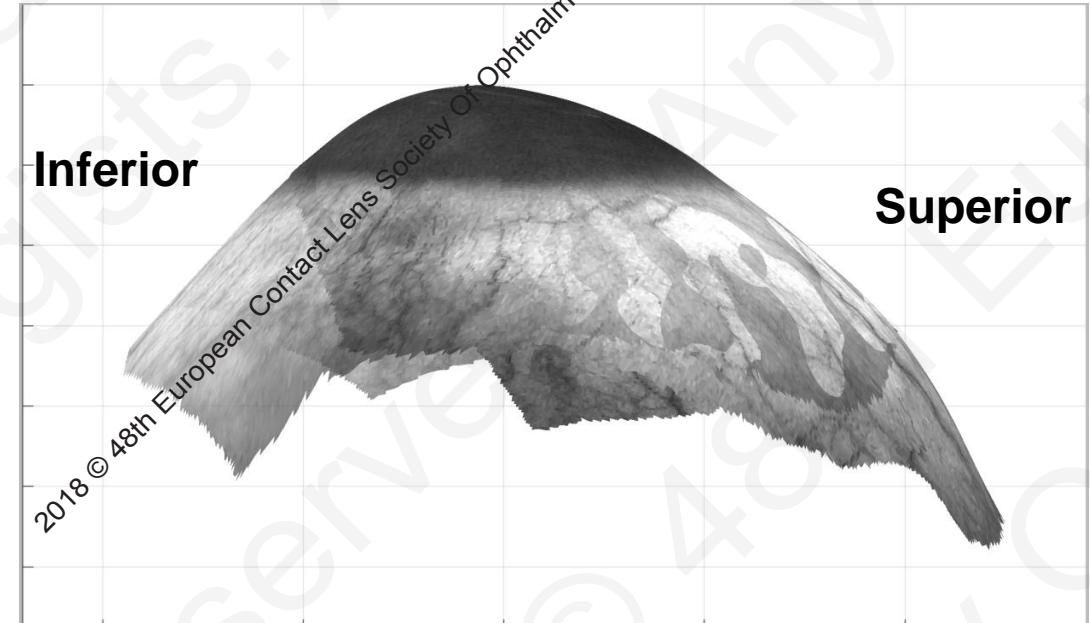

Scleral Asymmetry- Horizontal

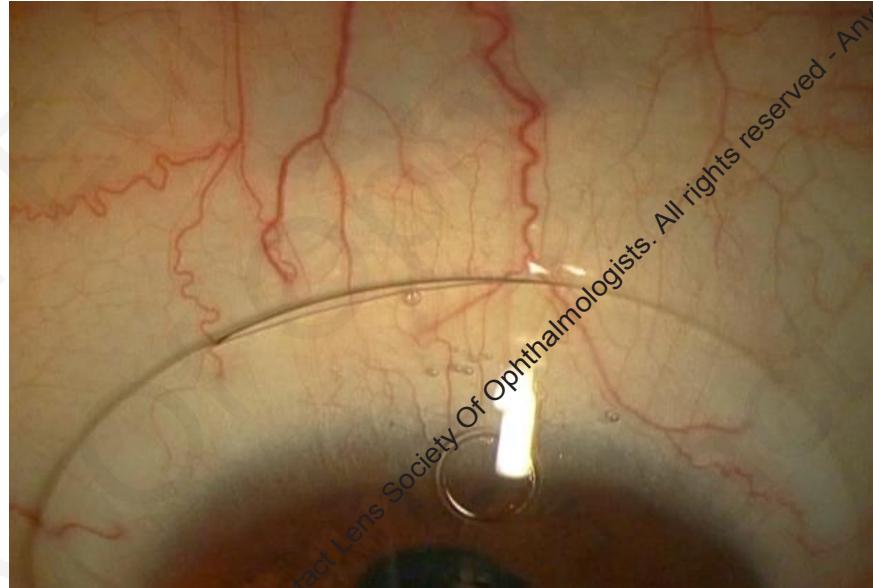

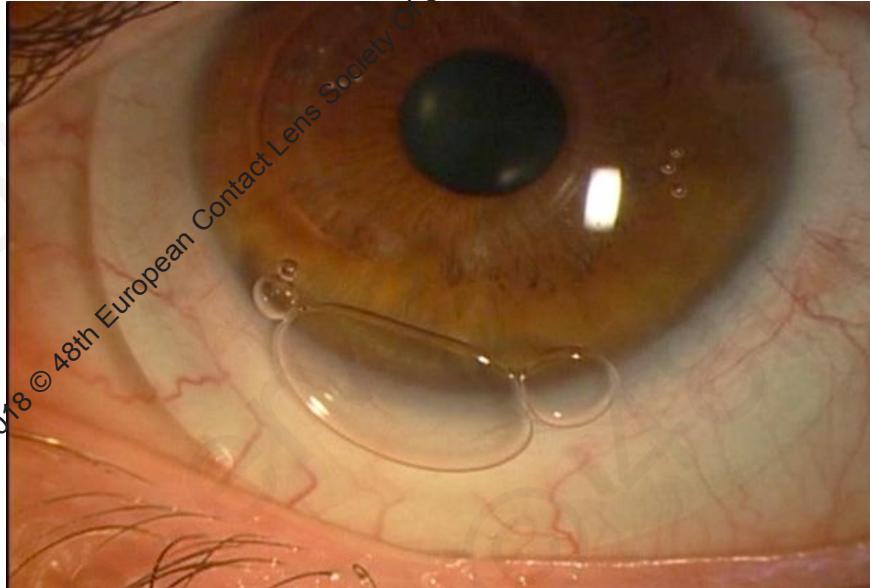

**Toric
Haptic**

Scleral Asymmetry- Vertical

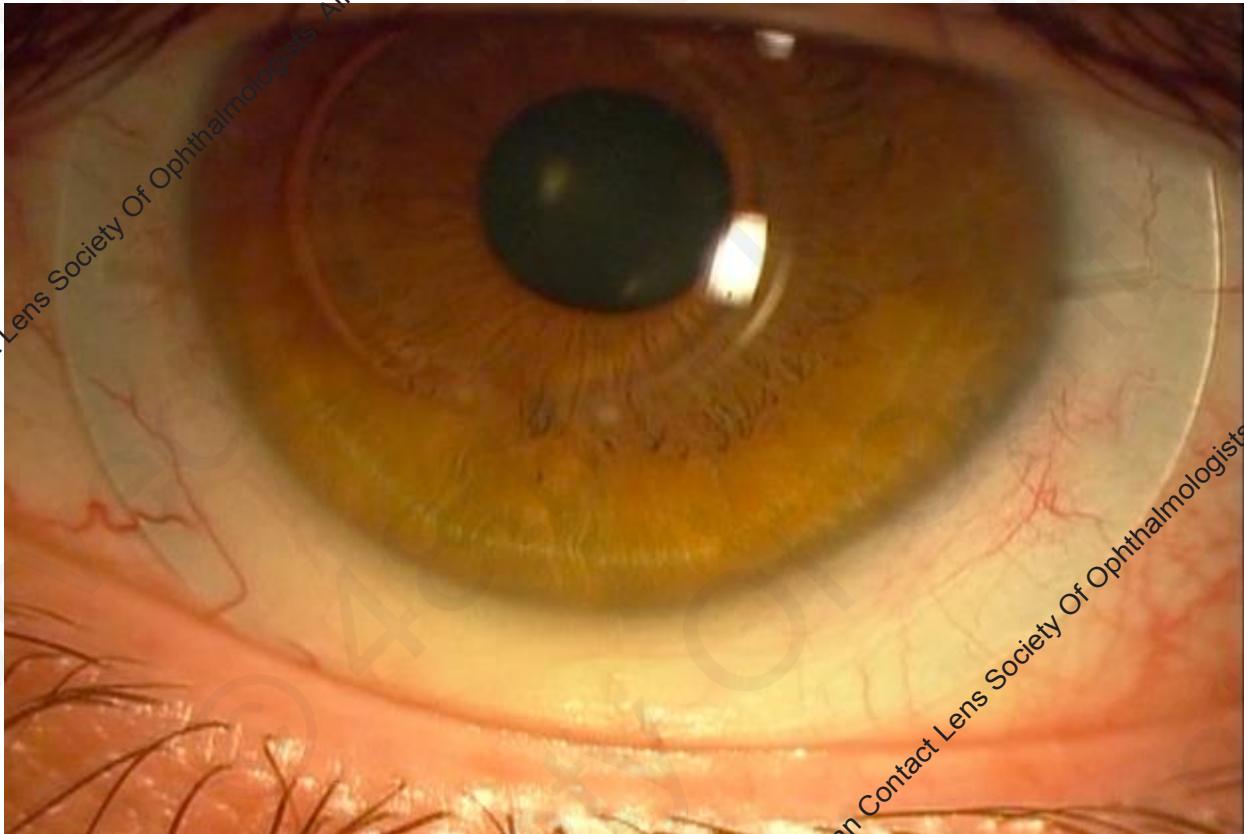

Scleral Asymmetry- Vertical

Back Surface Toric Haptic

Scleral Asymmetry- Vertical Quadrant Specific Design

Back Toric Scleral Lenses- Conclusions

- Avoid on spherical eyes
- Ideal Toric Eyes
 - Ballast lens front toricity
 - Inter-ocular differences
 - Scleral Topography
- Asymmetric Scleras
 - Improved- Horizontal
 - Quadrant design may be needed for- Vertical
