# EYE AND CONTACT LENS ASSOCIATION: CONTACT LENS EDUCATION FOR OPHTHALMOLOGISTS

Christina Rapp Prescott, MD, PhD

Residency Program Director

Vice Chair for Education

Director of the Cornea Service

## Financial Disclosures

- **Prescott:**
  - Johnson and Johnson Vision: Consulting fees
  - Santen: Consulting fees
- **CCOR program:**
  - Alcon
  - Coopervision
  - Dompe
  - ECLA Education and Research Foundation
  - Eyevance
  - Glaukos
  - Kala

## Current Problem

- Ophthalmology resident contact lens education is variable
- Many (most) ophthalmologists do not feel comfortable prescribing/managing contact lenses
- Ophthalmologists do not prescribe/manage contact lenses
- Few ophthalmologists are comfortable teaching residents about contact lenses
- The cycle continues...
  
- Contact lens technology is evolving, but ophthalmologists are not staying up to date

## CCOR: Contact Lens Curriculum for Ophthalmology Residents

- Eye and Contact Lens Association developed the Contact Lens Curriculum for Ophthalmology Residents (CCOR)
- **Faculty:**
  - Amanda R. Crum, OD/Johns Hopkins Wilmer Eye Institute, Baltimore, MD
  - Deepinder K. Dhalliwal MD/University of Pittsburgh Medical Center, Pittsburgh, PA
  - Haleh Ebrahimi, OD, University of Pittsburgh Medical Center, Pittsburgh, PA
  - Deborah S. Jacobs MD/Massachusetts Eye and Ear, Boston, MA
  - **Michelle K. Rhee MD/Icahn School of Medicine at Mount Sinai, New York, NY**
  - Christine W. Sindt OD/University of Iowa, Iowa City, IA
  - Loreta Szczotka-Flynn OD PhD/Case Western Reserve University, Cleveland, OH

# CCOR: Contact Lens Curriculum for Ophthalmology Residents

- **Learning Objectives:**

- Be familiar with the wide variety of contact lens types, technologies, and terminology
- Be able to choose and prescribe from among the contact lens types to effectively address patients' individual vision needs
- Understand how materials and fitting promote optimum contact lens comfort and sustainable use
- Be familiar with insertion and removal techniques
- Be able to instruct patients regarding storage, disinfection, and safety
- Become familiar with therapeutic uses of contact lenses, as well as other special applications such as cosmetic use and for myopia control
- Understand the role of specialty contact lenses in addressing ocular surface disease

# CCOR: Contact Lens Curriculum for Ophthalmology Residents

- **7 Modules:**

- Module 1: Contact Lens Platforms (11:32 min) 10 quiz questions
- Module 2: Soft Contact Lenses (16:26 min) 10 quiz questions
- Module 3: Rigid Gas Permeable Contact Lenses (24:48 min) 10 quiz questions
- Module 4: Ocular Surface Disease (13:22 min) 5 quiz questions
- Module 5: Keratoconus and Irregular Astigmatism (11:32 min) 5 quiz questions
- Module 6: Contact Lens Complications & Safety (13:10 min) 5 quiz questions
- Module 7: Myopia Management (14:59 min) 5 quiz questions

# Your Experience on Computer and Mobile Devices

## Computer

Click on **speaker script** tab to read the speaker text

Program Length:

Program will be narrated, the volume can be adjusted

Seek Bar

Maneuver through the lesson using the **prev** and **next** buttons

## Mobile Devices

Contact Lens Platforms

Click on **slide title** to maneuver to specific slides or click on **speaker script** tab to read the speaker text!

Slides can be advanced by **arrow** or by **swiping left or right**

Functionality can vary depending on mobile device and/or vertical or horizontal orientation

**THANK YOU**
